Computer information systems student and software tester seeking an IT or networking role, bringing hands-on QA, API testing, and Linux experience to the systems people rely on every day

EXPERIENCE

Tier 2 QA

Clemson, SC

Eleos Technologies

Jun 2026 – Present

- Own QA deliverables for assigned user stories, aligned with broader development timelines
- Evaluate acceptance criteria and design test plans around complex edge cases before implementation
- Own and improve regression protocols, evaluating system stability ahead of each deployment
- Partner with engineers to resolve complex defects, documenting expected vs. actual outcomes
- Mentor new testers through QA procedures and help establish team-wide best practices

Tier 1 QA

Clemson, SC

Eleos Technologies

May 2025 – Jun 2026

- Tested new features, bug fixes, and enhancements across mobile (Android/iOS) and web
- Validated API endpoints in Postman and inspected network traffic in Proxyman to isolate root causes beyond the UI
- Logged defect reports with reproduction steps, expected vs. actual behavior, environment data, and logs
- Triage defects by reproducibility, severity, and priority; escalated blockers and verified developer fixes
- Ran sprint, regression, and release smoke testing; maintained test suites, plans, and QA documentation

Fine Print – Chrome Extension, CUHackit26 Hackathon

Feb 2026

JavaScript, HTML, CSS, APIs

- Built a Chrome extension with a team in 24 hours that detects terms and conditions on a page, including behind hyperlinks
- Summarized dense legal language on a single click so users can review agreements without leaving the page

Checkers Game – Java Terminal-Based Game Project

Java, IntelliJ, Git

- Built core game engine components including move validation, capturing logic, and king progression
- Tracked game state with clean object-oriented design across a team codebase managed in Git
- Wrote unit tests verifying movement rules, turn order, and win conditions

Chain Reaction Game – C++/Unix Terminal-Based Game Project

UNIX, Vim, C++

- Developed a turn-based strategy game simulating the classic Chain Reaction board game
- Implemented player logic, grid management, and chain connection mechanics with object-oriented principles
- Designed for a terminal interface with clear visual updates and input handling on Unix systems

EDUCATION & CERTIFICATIONS

Clemson University

Clemson, SC

Bachelor of Science in Computer Information Systems, Minor in Cybersecurity

Aug 2024 – Present

Transferred from Greenville Technical College

Riverside Highschool

Greer, SC

High School Diploma

May 2022

API Testing Path (v12) – Postman Academy

Aug 2026

verify.skilljar.com/c/e96z28imc2tg

ADDITIONAL SKILLS

- Java, C++, C, Python | JavaScript, HTML, CSS | Unix, Linux, Vim | OOP, Data Structures
- Manual & exploratory testing | API testing (Postman, Proxyman) | Regression & release testing
- Defect reporting & triage | Agile, Scrum & Waterfall | Git, GitHub, IntelliJ, VS Code
- MongoDB, Firebase, JSON | Microsoft Office | English & Arabic fluent, Spanish beginner
